

# POST CONSTRUCTION OFFICE CLEAN

# RED LION STREET

# PROJECT OVERVIEW:

Simplicity Services was appointed to carry out a full post construction clean for a newly refurbished commercial office space in London.

The project included open plan working areas, meeting rooms, kitchens, breakout spaces and internal glazing

# OUR APPROACH

Our team delivered a structured deep clean, working methodically through the space to ensure no detail was missed.

- Detailed cleaning of desks, chairs and fitted furniture
- Internal window and glass partition cleaning
  - Kitchen and breakout area cleaning
- Floor vacuuming and mopping throughout
  - Removal of fine dust and residue from all surfaces

All cleaning was completed using professional equipment and site appropriate products to achieve a high standard finish.

# THE CHALLENGE

Following refurbishment works, the site required a detailed clean to remove construction dust, surface residue and installation marks.

With new furniture, glass partitions and finishes in place, the clean needed to be thorough while protecting all newly installed elements.

# THE RESULT:

The workspace was left clean, fresh and ready for immediate occupation.

The final presentation reflected the quality of the refurbishment and allowed the client to hand over the space with confidence.
